

SUPER PAC™

DRILLING FLUID ENHANCER

DESCRIPTION

SUPER PAC™ is an easy mixing, liquid polymer that enhances the properties of a bentonite drilling fluid. When added to ULTRA GEL® or HYDRAUL-EZ® or SUPER GEL-X®, SUPER PAC™ creates an ideal fluid for drilling in a variety of conditions.

RECOMMENDED USE

This multifunctional polymer is designed for use as a drilling fluid additive for inhibition of clay and shale, minimizing fluid loss to the formation, and increasing viscosity for cuttings transport and suspension.

CHARACTERISTICS

- Increases viscosity of drilling fluid
- Inhibits the hydration of clays and shale
- Provides filtration control in both fresh and saltwater
- Reduces fluid loss in permeable formations

MIXING AND APPLICATION

Mix at low shear through a mud hopper. Add 1 to 2,5 liter per 1000 liters of existing bentonite drilling fluid for hole stabilization.

PACKAGING

25 liters pail, 24 per pallet (1,2 m x 0,8 m) or 25 liters pail, 36 per pallet (1,15 m x 1,15 m). All pallets are plastic-wrapped.
